### **DETAILED ACTION**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Freedman on January 4, 2005.

#### **In the claims:**

Non-elected claims 1-9 are cancelled.

#### ***Allowable Subject Matter***

2. Claims 10, 12-14, and 16 (renumbered 1-5) are allowed. The following is an examiner's statement of reasons for allowance:

Frosch, which is seen to constitute the closest prior art of record, recognizes the use of an apparatus (for manufacturing a nonwoven) comprising a carding machine and a pair of staggered doffer units. Furthermore, while Frosch fails to teach the inclusion of a laying/directing assembly, such an arrangement is commonly used in the manufacture of nonwoven articles in order to provide a fabric with high tensile strength and dimensional stability (results in fibers being aligned in the cross direction and machine direction), as shown for example by Coates. However, one of ordinary skill in the art at the time of the invention would not have found it obvious to use the specific

laying/directing assembly of the claimed invention in the apparatus of Frosch in view of Coates. In particular, as argued by applicant (Pages 13 and 14), the claimed structural arrangement of the web redirecting rods, the turning rolls, and the guiding belt is not disclosed, suggested, or taught by the prior art references of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
